

Community Coin (COMM)

ADD COIN TO WALLET

Step 1. Get Token Information

Community Coin (COMM) information

- **Contract Address – 0x012de93b125d3b765dd1f58d6d11204fb59a6935**
- **Token Name – Community Coin**
- **Token Symbol – COMM**
- **Decimals – 18**

You can also [find it here on BSC Scan](#).

Step 2. Add Coin To Wallet

Search for coin in your wallet. If it has COMM BEP20 coin, then select add to or turn on for it to be visible in wallet.

If it is not visible or not found by search, you will have to manually add it to your wallet. To do so, follow the list of steps below. Keep in mind these steps may have variations for each wallet.

- a. Look for and select Add Custom Token, Add Coin, or Add in your wallet**
- b. On the next screen, it should have a form that requires you to input the information from Step 1.**
- c. Select Binance Smart Chain as your network.**
- d. Add the Contract Address, Token Name, Token Symbol, Decimals to their appropriate section**
- e. When completed, verify information is accurately inputted and then select Done or Finish.**
- f. Return to main screen of your Wallet where coins/tokens are listed and you will see COMM listed as BEP20.**
